

CLAIMS

WHAT IS CLAIMED IS:

1. An on-line magazine comprising:
reading content in a format of a printed publication; and
5 links to product pages.
2. The on-line magazine of claim 1 wherein at least one product page link is
provided within at least one article of the on-line magazine.
- 10 3. The on-line magazine of claim 1 further comprising at least one of:
magazine page navigation controls that enable a reader to navigate the on-line
magazine, magazine table of contents, magazine page numbers, section identifiers, section
locators, page locators, page divider, and shopping table of contents.
- 15 4. The on-line magazine of claim 3 wherein the at least one of the magazine
table of contents and the shopping table of contents include at least one of an alphanumeric
locator and a user selectable link that causes the reading content associated with the user
selectable link to be displayed.
- 20 5. The on-line magazine of claim 3 wherein the section locators are selected
from the group consisting of a pull-down menu, radio buttons, and hypertext links.
6. A method of ordering a product using an editorial content provider

comprising:

transmitting editorial content to a user, wherein the editorial content includes a user selectable link to a product identified in the editorial content; and

transmitting a product page associated with the user selectable link to the user.

5

7. The method of claim 6 wherein the editorial content comprises at least one of an electronic magazine and a newspaper that includes at least one of page numbers associated with the at least one of an electronic magazine and a newspaper, page navigation controls associated with the at least one of an electronic magazine and a newspaper, table of contents, shopping table of contents, section identifiers, section locators, page divider, and page locators.

10

8. The method of claim 7 wherein at least one of the table of contents and the shopping table of contents include at least one of an alphanumeric locator and a user selectable link that causes the editorial content associated with the user selectable link to be displayed.

15

9. The method of claim 6 further comprising:

enabling the user to order the product, wherein the product is ordered using a server of a product provider.

20

10. The method of claim 6 wherein the transmitting editorial content to a user includes:

transmitting an electronic mail message to the user, wherein the electronic mail message includes an editorial content link to the editorial content.

5 11. A method of ordering a product using an editorial content provider comprising:

receiving the editorial content from a first server, wherein the editorial content includes a user selectable link to a product identified in the editorial content;

displaying the editorial content and the user selectable link to a user;

receiving user input regarding editorial content navigation;

10 transmitting a user input request to a second server based on the user input;

receiving data related to the user input request; and

displaying the data to the user.

12. The method of claim 11 further comprising:

15 transmitting at least one of a next page request, previous page request, and a specific page number request to the first server; and

receiving one of the next page request, previous page request, and specific page request from the first server.

20 13. The method of claim 11 further comprising:

receiving a selection of the user selectable link; and

transmitting the selection to the second server;

receiving a product page associated with the user selectable link.

14. The method of claim 11 further comprising:

receiving an electronic mail message, wherein the electronic mail message includes an editorial content link to the editorial content.

5

15. The method of claim 11 wherein the editorial content is presented as one of an electronic magazine and a newspaper.

16. A system for ordering a product using an editorial content provider comprising:

10

an editorial content transmitting module that transmits editorial content to a user, wherein the editorial content includes a user selectable link to a product identified in the editorial content; and

a product transmitting page that transmits a product page associated with the user selectable link to the user.

15

17. The system for claim 16 wherein the editorial content is presented as one of an electronic magazine and a newspaper.

18. The system for claim 17 wherein the electronic magazine includes at least one of magazine page numbers, magazine page navigation controls, table of contents, shopping table of contents, section identifiers, section locators, page divider, and page locators.

20

19. The system for claim 18 wherein at least one of the table of contents and the shopping table of contents include at least one of an alphanumeric locator and a user selectable link that causes the editorial content associated with the user selectable link to be displayed.

5

20. The system for claim 16 wherein the product is ordered using a server of a product provider.

21. The system for claim 16 further comprising:

10 an editorial content request receiving module that receives a request for editorial content from a user; and

an accessing module that accesses an electronic storage device that includes the editorial content requested.

15

22. The system for claim 16 further comprising:

a display causing module that causes the editorial content to be displayed to the user.

23. The system for claim 16 further comprising:

a product order enabling module that enables the user to order the product.

20

24. The system for claim 16 further comprising:

an electronic mail message transmitting module that transmits an electronic mail message to the user, wherein the electronic mail message includes an editorial content link to

the editorial content.

25. A system for ordering a product using an editorial content provider comprising:

5 an editorial content receiving module that receives editorial content from a first server, wherein the editorial content includes a user selectable link to a product identified in the editorial content;

an editorial content displaying module that displays the editorial content and the user selectable link to a user;

10 a user input receiving module that receives user input regarding editorial content navigation;

a user input request transmitting module that transmits a user input request to a second server based on the user input;

a data receiving module that receives data related to the user input request; and

15 a data displaying module that displays the data to the user.

26. The system for claim 25 further comprising:

a transmitting module that transmits at least one of a next page request, previous page request, and a specific page request to the first server; and

20 a receiving module that receives the at least one of a next page request, previous page request, and a specific page request from the first server.

27. The system for claim 25 further comprising:

a selection receiving module that receives a selection of the user selectable link;
a selection transmitting module that transmits the selection to the second server; and
a product page receiving module that receives a product page associated with the user
selectable link.

5

28. The system for claim 25 further comprising:

an editorial content request transmitting module that transmits an editorial content
request to the first server.

10

29. The system for claim 25 further comprising:

an electronic mail message receiving module that receives an electronic mail
message, wherein the electronic mail message includes an editorial content link to the
editorial content.

15

30. The system for claim 25 wherein the editorial content is presented as at least
one of an electronic magazine and a newspaper.
